

## Sample Risk Assessment

Activity: Using Machinery and power tools.

Hazards	Moving parts of machines and ejected materials
Persons at Risk	Members, supervisors and Shed visitors

Risk Assessment_	Members risk <u>serious</u> injuries from contact with moving parts of machinery, particularly saw blades or from being hit by ejected material
Control Measures_	Where necessary machines are braked and fitted with safety features  All machines are guarded according to manufacturers' instructions Guards are regularly inspected and maintained to make sure they remain in good condition  Members are provided with protection appliances, such as jigs, holders_ and push sticks  Members have sufficient space to work safely at the machines  Supervisor checks that members always use the guards  All members and supervisors are trained how to use the machines safely and competently. Then signed off to authorise use.
Further Control Measures	

### Personal Protective Equipment (PPE): Identify all necessary PPE

Eye / Face	X	Hand /Arm		Feet / Legs		Respiratory	X
Body (clothing)		Hearing	X	Other (Specify)			

Specify the grade(s) of PPE to be worn: : *Must be CE marked in accordance with **Directive 89/686/EEC** - personal protective equipment*

Specify when during the activity the item(s) of PPE must be worn: *When appropriate to the machine being used, as per training and induction procedures*

### Engineering controls

Guarding	X	Extraction	X	Interlocks		Enclosure		PAT Testing	X
----------	---	------------	---	------------	--	-----------	--	-------------	---
